

eCATS Login process for Honeywell Aerospace internal users

eCATS Login Process – Honeywell Aerospace Internal Users

This flow chart shows all the steps required for Honeywell Aerospace Internal users to successfully login to the eCATS System

The Honeywell Aerospace ID for Honeywell Aerospace internal users is the EID (not the same as the eCATS Profile). In order to login to eCATS, Honeywell Aerospace internal users need to use the Honeywell Aerospace ID (EID and LDAP password).

The eCATS Profile is used to identify your eCATS system account. CARs are addressed by using eCATS Profiles (not the same as the Honeywell Aerospace ID). The eCATS Profile usually uses the format Exxxxxx for Honeywell Aerospace internal users, but can have prefixes or suffixes (e.g. ENGE123456 or E123456PHX).

Steps (in order of use):

1. Honeywell Aerospace ID (EID+LDAP password)
2. eCATS Profile
3. Honeywell Aerospace ID to eCATS Profile association (just once)

The combination of EID + LDAP password is the same combination used to login to the Honeywell Aerospace Intranet and other Honeywell Aerospace Systems using the LDAP protocol.

Thank you
